2. The following is an examiner's statement of reasons for allowance:

In considering claims 1, 6, 17-19, and 26-27 the prior art of record fails to disclose or render obvious all of the claimed limitations.

Applicant's invention is drawn to a network photograph service system, which provides digital photograph services such as a printing service on a network.

Applicant's independent claims 1, 6, 17, 26, and 27 each recite, *inter alia*, a network photograph service system comprising: image storing means for storing a plurality of images; image selecting means for enabling a service user to select at least one of the plurality of stored images, by enabling the stored image to be viewed on the network; mail generating means; destination address specifying means, mail transmitting means, and user address setting means enabling a service user to directly set the address of the sender of the electronic mail message, wherein the address of the sender is an automatic reply address. Applicant's invention of claims 1, 6, 17, 26, and 27 comprise a particular combination of elements, which is neither taught nor suggested by the prior art.

Applicant's independent claims 18 and 19 each recite, *inter alia*, transmitting the electronic mail message with attached image to the recipient, wherein said transmitting step transmits the electronic mail message with image attachment using the set send address of the user. Applicant's invention of claims 18 and 19 a particular combination of elements, which is neither taught nor suggested by the prior art.
